Report on Vermicomposting Programme

Swami Dharmabandhu College of Education, Hazaribag, successfully organised a Vermicomposting Programme under the aegis of the Haritima Eco Club NSS Unit-I to promote environmental awareness, sustainable waste management, and eco-friendly practices among faculty members and trainee teachers.

The programme was conducted in the college campus in the presence of Principal Dr. Sarika Kumari, faculty members, and trainee teachers. Addressing the gathering, Dr. Sarika Kumari emphasized that environmental conservation is a collective responsibility and encouraged everyone to adopt sustainable practices in their daily lives. She highlighted that vermicomposting is an eco-friendly technique that converts biodegradable waste into nutrient-rich organic manure, improves soil fertility, reduces dependence on chemical fertilizers, and contributes to a cleaner and greener environment.

During the programme, participants received a practical demonstration of the vermicomposting process. They learned the scientific method of converting biodegradable waste into organic compost, understood the role of earthworms in soil enrichment, and explored the environmental and agricultural benefits of organic manure. The programme inspired participants to adopt sustainable waste management practices and contribute actively towards environmental protection.

The programme concluded with a collective pledge by all participants to conserve natural resources, promote green practices, and support sustainable development in their personal and professional lives.

Objectives

- To create awareness about environmental conservation and sustainable development.
- To provide hands-on training on the scientific process of vermicomposting.
- To encourage the effective recycling and management of biodegradable waste.

- To promote organic farming and reduce dependence on chemical fertilizers.
- To enhance environmental responsibility and sustainable lifestyle practices among trainee teachers.
- To develop practical skills in preparing and using organic compost.
- To encourage active participation in green campus initiatives through the Haritima Eco Club NSS Unit-I.

Conclusion

The Vermicomposting Programme was a successful and meaningful initiative that promoted environmental awareness, practical learning, and sustainable waste management. It encouraged participants to adopt eco-friendly practices and reinforced the institution's commitment to environmental conservation. The programme reflected the vision of Swami Dharmabandhu College of Education and the Haritima Eco Club NSS Unit-I in fostering responsible citizens committed to building a cleaner, greener, and more sustainable future.
